My eQuals allows you to easily check people's education claims, anywhere, anytime

My eQuals eliminates one of the major sources of credentials fraud by allowing verification agencies, employers and recruitment professionals to instantly verify the education claims of students and graduates. My eQuals documents are legally valid and tamper-evident.

Participating education providers certify and upload official academic credentials and records to the My eQuals platform. Students and graduates can then access these documents and easily share them online with employers, education providers or any other third party. The records are cryptographically signed and cannot be tampered with in any way. That's why you can trust My eQuals to verify education claims.

Who are the participants?

My eQuals is home to every major university in Australia and New Zealand and an increasing number of other tertiary Education Providers. You can find a complete list of participating education providers on the My eQuals website. Currently, more than 1.6 million students and graduates use the service.

How do I use My eQuals?

The student, graduate or alumnus controls their My eQuals credentials and how they share them. All you have to do is ask the student or graduate to share them with you by sending you a secure link that allows you to receive and verify their credentials through My eQuals.

That link will allow you to view the original academic record online and download a cryptographically signed PDF version of the document. When viewed with Adobe Reader, the pdf includes a "blue ribbon" digital signature. This ribbon attests that the record is genuine and has not been tampered with.

You can also integrate My eQuals into your verification process through an API integration or by becoming a Receiving Organisation.

Make My eQuals an integral part of your verification process

How do I integrate My eQuals into my verification process?

My eQuals allows organisations processing high volumes of education claims to integrate the platform into their existing automated business or verification process. There are currently two ways to do this:

1. Become a Receiving Organisation - this provides you with your own portal where you can directly receive academic credentials shared by Learners. It also allows you to store and manage all records shared with your organisation in one secure place.
2. Direct Integration - this integrates My eQuals into your existing automated business process, such as an online application.

Contact us for further information.

What does My eQuals cost?

Learners can share their credentials with you through My eQuals at no cost. If your organisation processes high volumes of education claims and wishes to become a Registered Organisation or integrate the My eQuals platform into your business process, these services incur an implementation fee and an annual subscription. Contact us for further information.

Why should you use My eQuals?

My eQuals is trusted and accepted around the world as a simpler and more efficient way to view, share and verify credentials. It's 100% secure and 100% reliable, eliminating one of the major sources of education claims fraud.
